

STEINWAY LYNGDORF

Steinway & Sons

Head Unit Processor

The Head Unit Processor is a testament to both craftsmanship and control. The distinctive volume wheel is crafted from 1 kg of gold-plated brass and mounted on precision-machined Swiss bearings.

A STATEMENT PROCESSOR

The Head Unit is an in-room statement processor and together with the iconic volume wheel, it is the perfect partner for Steinway & Sons Model O, B, C, and D speaker systems.

MEDIA CENTER FOR SURROUND SOUND SYSTEMS

With the built-in media-player, the Head Unit integrates perfectly with streaming audio, and advanced digital processing technologies like RoomPerfect™ ensure optimal performance in all environments.

Now featuring HDMI inputs and outputs, the Head Unit Processor can function as a media center for high-performance stereo systems and surround sound systems (up to 12 native channels). It also supports immersive video formats, including 4K with the new high dynamic range formats.

Fully digital processing, in combination with the Steinway Lyngdorf Digital Link, keeps the audio stream entirely in the digital domain, while maintaining full resolution of the original signal. This means nothing gets between you and your sound.
