

STEINWAY & SONS

An iconic name, and an unsurpassed audio experience

Steinway Lyngdorf brings together Steinway & Sons, makers of the world's finest pianos for more than 165 years, and Peter Lyngdorf, one of the most forward-thinking audio innovators of our time.

The collaboration is based on an ambitious promise – that Steinway Lyngdorf systems would reproduce the sound of a Steinway & Sons grand piano to the highest degree possible.

Designed, developed, and manufactured in Denmark, Steinway Lyngdorf sound systems are the only systems in the world that are qualified to be manufactured in partnership with Steinway & Sons.

A close-up photograph of a Steinway & Sons piano. The image shows the interior of the open lid, which is lined with a dark, textured felt. Below the lid, the fallboard is visible, featuring a polished gold-colored plate with a circular black felt cover. The Steinway & Sons logo, a lyre, is embossed on the black-painted wood of the fallboard, with the brand name "STEINWAY & SONS" printed in gold capital letters below it. The piano's body is finished with a high-gloss black lacquer, and the overall lighting is dramatic, highlighting the textures and metallic finishes.

STEINWAY & SONS

Bringing Steinway & Sons audio systems to the world of yachts

Steinway & Sons is the most iconic brand in the world of music, and immediately recognized by yacht owners as well as their family and friends, business partners, and guests.

Designing an extraordinary high-end audio system in rooms with the restrictions and limitations caused by the overall design of a yacht is close to impossible . . . but only close. Enter the world of Steinway Lyngdorf, where acoustical know-how, ingenious technological innovations and outstanding products are perfectly suited for yachts.

The audio/video entertainment system should sound perfect in any room or environment - and we can promise it will be.

Loudspeakers and sound systems perfectly suited for yachts

Custom-made to suit every space

With a wide portfolio of loudspeakers (for in-room, in-wall, on-wall, in-ceiling), amplifiers and audio/video processors, as well as custom-made designs for your project, every room and yacht space can be turned into a private home cinema, listening suite, or concert hall. You dream it, we build it.

Room-calibrated for best sound quality

Our proprietary RoomPerfect™ technology is a unique digital sound calibration which measures the room acoustics and adapts the speaker's sound to any room and interior. With this customized calibration, we can ensure an extraordinary listening experience, even in the acoustically challenging environment of a yacht.

Extraordinarily power-efficient & reliable

Our amplifiers and processors use our own digital audio technology, making them extraordinarily power efficient, cool running, straightforward to install and reliable over time. Every unit is built, assembled, and thoroughly tested for 24 hours at our facility before it becomes part of the designated audio/video system on board.

Craftmanship on the highest level

The Steinway & Sons brand represents a commitment to quality. Our loudspeakers and electronics are designed and manufactured to meet the highest quality demands, which is mandatory in the world of the finest yachts and private homes.

*P*erfectly suited for yachts:
Custom-made to suit every space

Loudspeakers for every project. With a wide portfolio of loudspeakers (for in-room, in-wall, on-wall, in-ceiling), audio/video processors, amplifiers, as well as custom-made designs for your project, every room and yacht space can be turned into a home cinema, listening suite, or private concert hall. This can range from the most discreet and space-saving sound system, to an outstanding pair of reference loudspeakers able to reproduce a full-scale orchestra, or up to a 16-channel home cinema with the latest Dolby Atmos, DTS:X and Auro 3-D immersive audio for an unforgettable movie experience.

We understand acoustics. Based on our expertise in different audio systems for private homes and marine projects, we can select, adapt, and custom-fit our speakers to every room, space, and interior design. Our amplifiers are scalable to as many channels and speakers as required. This unique combination of outstanding loudspeakers, our own sound processor technology, and a high degree of customization allows solutions for even the most demanding yacht project.

Fine-tuned for the listener. Our sound processors allow further customization to meet the expectations of the listener, during and even after the system has been installed. Up to 32 Voicings can be selected or created, matching different listening scenarios, listeners, or musical preferences.

*P*erfectly suited for yachts: Room-calibrated for best sound quality

More freedom for architects and interior designers. A yacht usually represents very poor room acoustics from a given space and room design. Room-acoustical problems become inevitable and deteriorate the sound experience. RoomPerfect™, developed by Steinway Lyngdorf, is the world's most sophisticated and advanced solution for room calibration. It measures the room acoustics and digitally adapts the loudspeaker's sound to the room. RoomPerfect™ also aligns all speakers regardless of their placement, allowing more freedom when planning the listening room or home cinema together with architects and interior designers.

Invisible. The RoomPerfect™ calibration process measures the sound in the room once after the installation, and permanently corrects room acoustical issues in the digital signal processing – discreetly and completely invisible to the listeners. The audible result is a better soundstage, tighter bass, and an overall purer sound.

Less sound disturbance. RoomPerfect™ also makes the sound system on board more efficient and less disturbing, as it removes unwanted sound energy, minimizes low-frequency resonance, and reduces sound transmissions through the walls.

Sounds perfect. The audio/video entertainment system should sound perfect in any given room - and we can promise it will be.

*P*erfectly suited for yachts:

Extraordinarily power-efficient & reliable

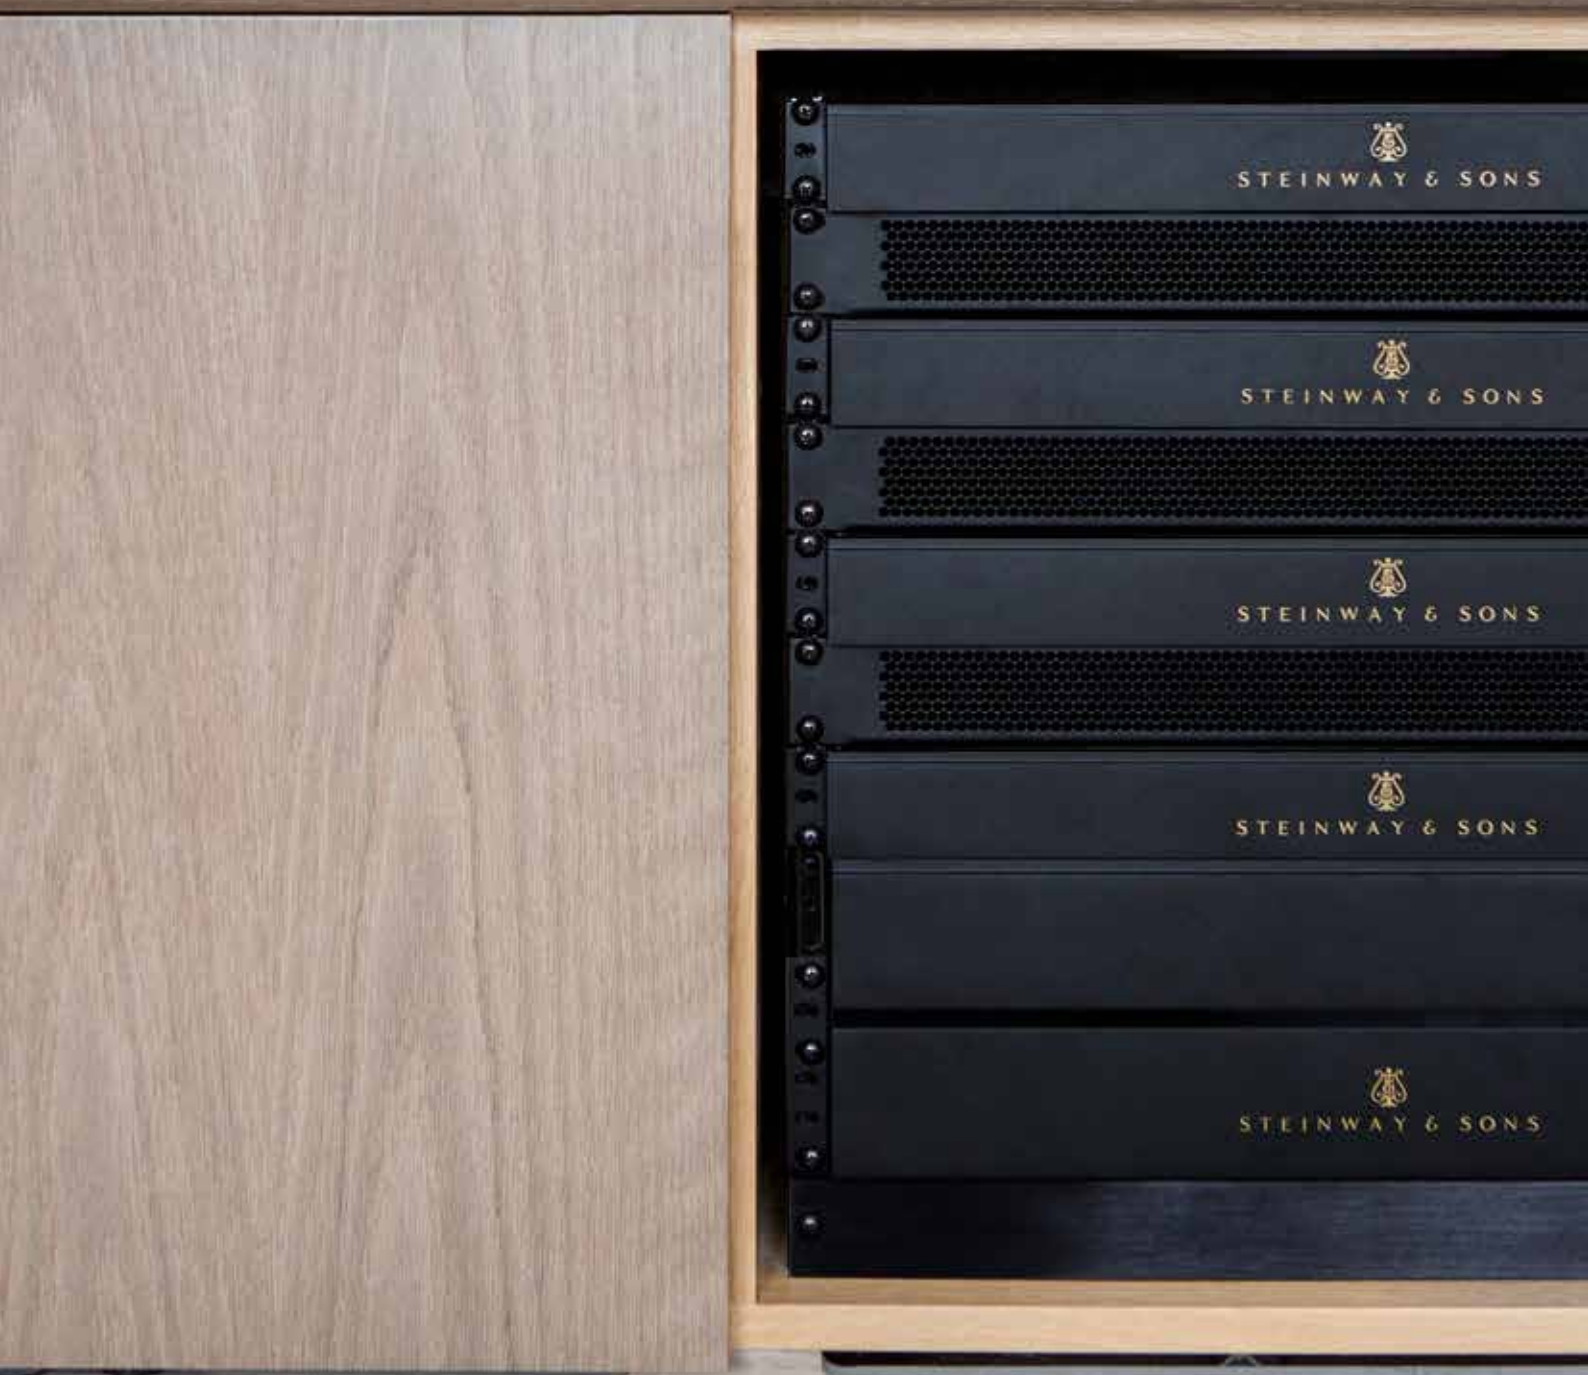

Reliable. The Steinway & Sons amplifiers and processors use our own digital audio technology, making them extraordinarily power efficient, cool running, straightforward to install, and reliable over time.

Power efficient. Our own digital power amplifier design and digital signal processing pioneered the high-end audio market over two decades ago. Our technologies are the most power efficient on the market, using over 90% of the energy for the sound signal, with exemplary low heat build-up and no internal fan cooling required inside the amplifier. This makes our amplifiers very reliable, both in daily use and over time, with typically no maintenance required after the installation has left the shipyard.

Save and clean electrical load. Our internal power supplies feature built-in power conditioning and power-factor correction, making them a safe and clean electrical load for the ship's on-board mains power supply. All devices turn on in sequence, further minimizing power requirements.

Silent. Our electronics are extremely quiet. The power-efficient amplifier design and heat-dissipating layout require no internal fan-based cooling, while the digital signal processing makes it immune to noise from mains power and electronic interference. This keeps the speakers absolutely quiet, with no audible hiss or discernible background noise.

Thoroughly tested. Every unit is built, assembled, and thoroughly tested for 24 hours at our facility before it becomes part of the designated audio/video system on board.

*P*erfectly suited for yachts:
Craftmanship on the highest level

A commitment to quality. High-end audio/video entertainment systems are part of the modern yacht experience, and owners as well as their family and guests demand only the very best audio-visual quality. Our Steinway & Sons loudspeakers and electronics are designed and manufactured in Skive, Denmark, to the highest quality requirements, just like the famous Steinway & Sons pianos.

Acoustic engineering. Our acoustic engineers, mechanical engineers, electronics designers, and assembly team care about the smallest detail, and take great pride in creating the very finest entertainment systems. This ensures that the choice of components, materials, and lacquers as well as build quality and sound quality is on the highest level in all our products.

Years of experience. Steinway Lyngdorf offers years of experience in the design and installation of ultra-high-end audio and video systems in private home cinemas, commercial home theaters, music studios, listening suites, penthouse apartments, and on private yachts all around the world.

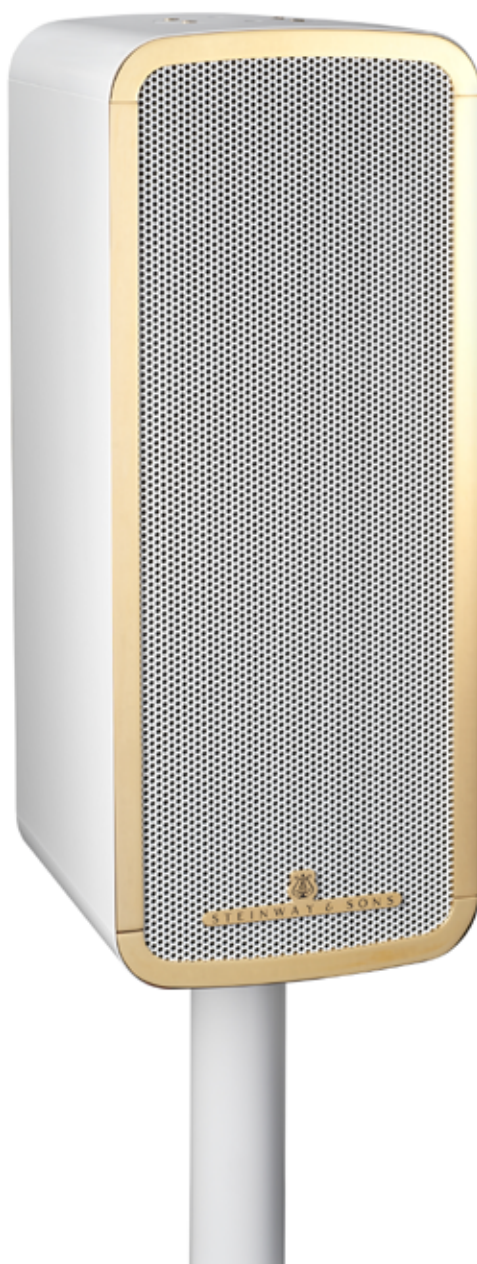

The best sound system. Our expertise and craftsmanship will help you to design the best suited sound system for your yacht project and achieve an unforgettable movie and music experience on board.

Our portfolio

Outdoor speaker

Steinway & Sons Marine Speaker
Full-range loudspeaker designed for outdoor use and marine environments

Indoor speakers

Steinway & Sons Model D

Highest sound quality from the original Steinway & Sons loudspeaker

Steinway & Sons Model C

Elegant loudspeaker with highest sound quality and enhanced room placement flexibility

Steinway & Sons Model B

Full-range loudspeaker with holographic and powerful sound

Steinway & Sons Model A

Full-range loudspeaker with a powerful sound designed for placement close to a wall

Steinway & Sons Model O

Sleek and stylish full-range loudspeaker with a small footprint

**Steinway & Sons
Model S Soundbar**
*High-performance on-wall
soundbar*

Steinway & Sons Model S-15
*Petite and innovative ambi-
ence-enhancing loudspeaker*

Steinway & Sons Model M Center
*Stylish high-performance on-wall
center loudspeaker with rigid
aluminum cabinet*

Steinway & Sons Model M L/R
*Stylish high-performance on-
wall loudspeaker with rigid
aluminum cabinet*

Steinway & Sons LS Concert
*Slim and tall line-source loudspeaker for large,
deep rooms and long listening distance*

Steinway & Sons LS Studio
*Slim line-source loudspeaker for large,
deep rooms and long listening distance*

Installation speakers

Steinway & Sons Model M Center

Stylish high-performance in-wall center loudspeaker with rigid aluminum cabinet

Steinway & Sons Model M L/R

Stylish high-performance in-wall loudspeaker with rigid aluminum cabinet

Steinway & Sons LS Center

Stackable line-source center loudspeaker for large, deep rooms and long listening distance

Steinway & Sons LS L/R

Stackable line-source loudspeaker for large, deep rooms and long listening distance

Steinway & Sons IW-16

Small high-performance in-wall speaker with improved dynamic headroom

Steinway & Sons IW-26V

High-performance vertical in-wall speaker with improved dynamic headroom

Steinway & Sons IW-26H

High-performance horizontal in-wall speaker with improved dynamic headroom, bi-amping

Steinway & Sons X-261, X-262

The ultimate in-wall speakers with improved dynamic headroom and high spl (X-262 for bi-amping)

Steinway & Sons IW-66

Large high-performance in-wall speaker with unique driver layout for increased power and coverage

Steinway & Sons IC-26

High-performance in-ceiling speaker with angled woofer and tweeter for immersive audio

STEINWAY & SONS IC-16 TM

High-performance in-ceiling speaker with angled tweeter for immersive audio

STEINWAY & SONS IC-16 LTF/RTR, IC-16 RTF/LTR

High-performance in-ceiling speaker with angled and turned tweeter for immersive audio

Steinway & Sons X-261C, X-262C

The ultimate in-ceiling speaker with angled tweeter and woofer for immersive audio (X-262C for bi-amping)

Woofers

Steinway & Sons LSR-212

Stylish in-room boundary woofer for powerful and accurate bass in very large rooms

Steinway & Sons LSR-210

Stylish in-room boundary woofer for powerful and accurate bass in large rooms

Steinway & Sons Model M BW

Compact and stylish in-room boundary woofer for powerful and accurate bass

Steinway & Sons Model S-210

Discreet and stylish in-room boundary woofer for powerful and accurate bass

Steinway & Sons LS BW

Stackable and versatile in-wall woofer for the most powerful bass in the largest rooms

Steinway & Sons BWS-110

High-performance in-wall woofer for custom installations

Steinway & Sons BWS-210

High-performance in-wall woofer for custom installations

Electronics

Steinway & Sons P300 2.1

Surround processor with RoomPerfect™ and HDMI 2.1 for the ultimate performance and immersive audio in larger setups

Steinway & Sons P100 2.1

Surround processor with RoomPerfect™ for the ultimate performance and immersive audio in smaller setups

Steinway & Sons A1

Powerful and reliable digital 2-channel amplifier for clear, defined sound

Steinway & Sons A2

Powerful and reliable digital 4-channel amplifier for clear, defined sound

Steinway & Sons SP-1

Stereo processor with RoomPerfect™ for digital and analog sound sources

Steinway & Sons CDP-1

Fully digital pure CD-Player with vibration-free construction and ICC for improved digital signals

Steinway & Sons Remote Control

Intuitive and elegant remote control with 24k gold plating and precision-machined Swiss bearings

Steinway & Sons Head Unit Processor

Surround and stereo processor with RoomPerfect™ for elegant in-room placement

Experience the extraordinary

"Steinway are hands down the best speakers I've ever heard." Sentinel AV

"I have never heard anything so realistic. I can't stop thinking about it." Analogue Seduction

"Steinway Lyngdorf systems are simply unbelievable." Command AV

"Steinway has actually got me excited about listening to music again." Sona Technology

"A mind and ear blowing experience. Truly remarkable." Environ Audio Ltd

"Nothing short of an enlightenment" Sagar Smart Homes

"These speakers can create a stunning audio atmosphere with a look like no other." Frank Foronjy

"After 22 home trials, every single customer has bought." CineHome
