

Steinway & Sons
X-262C

Steinway Lyngdorf commits to a new level of support for the Digital Cinema Initiative (DCI) with a collection of speakers designed for the ultimate Hollywood cinema and large format screening rooms. The X speakers are made specifically for both private and commercial projects that demand the highest possible performance. Designed for dedicated in-wall use, the X speakers are based on the already high-performing In-Wall Series but offer a more powerful level of performance.

THE XTREME VERSIONS

For immersive height channels, the X-261C is the in-ceiling solution, providing a performance upgrade to the IC-26 speaker currently available. The X-262C is the bi-amplified version.
